Please reconsider your decision regarding Uber. It is a popular service that is inevitable given the emerging sharing economy. It is obvious that lobby groups representing cab company owners have gotten their hooks into members of the SC government. I won't be voting for anyone that supports this ban.

We are strongly opposed to the cease and desist order to Uber.
What is the reason for this?

This is a big disappointment to see I will not be able to use uber this weekend or in the near future.

I have countless times used this service with ease to get myself or friends home safely. There is no comparison to taxis who you must call on the phone, talk to someone who may or may not be competent, then wait on a driver from who knows where to come pick you up.

At high demand times, taxis stop answering the phone. What are people suppose to do? Uber solved a problem and the regulators are not making this a problem again but worse because the public has already become reliant on this use of technology for a basic need- safe rides.

I'm sure there are complications in making uber legal but this move obviously is made by people who don't understand uber or have special interest in mind.

Uber is moving the industry forward. Charleston has great restaurants and many residents enjoy and then drive home because taxis are inconvenient and expensive. The streets are safer with Uber, for residents, students and tourists.
